Re: Case# DR98504

09-27-2004

Dr. Hoffman,

I am greatly concerned with the amount of pettiness that is being allowed to go on between all parties involved with this case. I seemed to be under the impression that you held the final word in the actions that are to involve my son James Griffin. Understanding that you are the "Eye of the Court" Guardian at Litem for James, I strongly urge you to put a stop to all of the childishness that is surrounding James. Both parents are adults and should act accordingly. Furthermore it has come to my attention that there are certain guidelines in place with concern to parenting time at my home. One of the guidelines is that James not be allowed to watch television if rated over PG. I cannot impose something like this when James consistently tells me about the R rated movies he is allowed to watch not only in the other parents home but in fact he is being taken to the theaters to watch these R rated movies. In looking at such guideline I have also learned that most television shows that are broadcast on National Television are of the rating PG-13. One of the shows that James speaks highly of is WW SMACKDOWN, a wrestling show. Not only does he speak highly of this show, quite frankly it concerns all parties involved at my home. He frequently shows acts of aggression that are interpreted from this show. This guideline is causing mass confusion to James and furthermore I believe that it be in his best interest to have the same types of guidelines imposed in both homes. In the event that there not be a trustworthy person to watch over Frances and James in the other home I would ask you make a recommendation to the court for some sort of supervision to be put in place. Again I believe these things are in James's best interest.

Sincerely,
Leonard Griffin
