

interoffice  
MEMORANDUM

---

**To:** File

**From:** TAD

**Subject:** Lenny Griffen

**Date:** September 15, 2004

TC to Dr. Hoffman, rtng his call. Said he has inquiry in to Dr. Cresewell, but has not heard back from him, and that he has spoken with Francis, and she wants to slowly wean James off the meds. Hoffman also indicated that James was very well behaved when he observed him in Lenny's company both at Lenny's house and in the park. He indicated that Lenny acted very appropriately around James, making him obey the rules, but giving him choices as he does so. He indicated that the only time he has observed James acting out was when he in the company of Francis. When I spoke to him, Hoffman was at James' school, and they indicated that he is doing quite well there, and is actively working hard in the behavioral management program he is involved in at the school.

Also said that Lenny came through the anger management assessment with flying colors, and that the evaluator Don Shive, has told Hoffman that Lenny does not appear to be a threat or danger in any way to James. Is leaning toward alternating weeks with parents (or weekends ? Not sure), but plans on meeting with Francis later today.

Issue of drug (marijuana) use. Lenny has had clean UA's, but admitted to using marijuana once in a while. Because of that, Dr Hoffman wants Lenny to have a drug evaluation completed, and probably provide clean UA's for at least 30 days. He also thinks that Lenny might benefit from seeing his family doctor with an eye toward obtaining some medication to reduce his anxiety level.

Set up tele conf w/Robt Fisher for sometime tomorrow in the afternoon.
